## SKILLS

- Python
- Django
- FastAPI
- MongoDB, MySQL
- Bootstrap
- Figma

## CERTIFICATE

BROADERAI IT SOLUTION LLP,  
SURAT  
Python Summer Internship  
Completion

## ABOUT ME

I hold a Bachelor's degree from GLS University and gained valuable hands-on experience during a 4-month internship. Currently, I'm working at Coderscotch Technologies, where I have developed robust web applications and integrated user-friendly interfaces. I'm passionate about leveraging technology to solve real-world problems. I thrive in collaborative environments and am eager to continue learning in the dynamic field of web development. Additionally, I am eager to learn and develop solutions using AI, with a quick 3-5 day learning period to adapt to new Python frameworks and technologies.

## WORK EXPERIENCE

2024 April - Current

### PYTHON-DJANGO DEVELOPER

#### Coder Scotch Technologies, Ahmedabad

I completed a 4-month internship at Coderscotch Technologies, where I developed my skills in Python programming and software development. Currently, I work as a Python Django Developer, responsible for designing and maintaining applications, writing clean code, and collaborating with my team to deliver high-quality solutions. This experience has significantly enhanced my technical abilities and problem-solving skills.

## PROJECTS

### • CODERSCOTCH CRM

CoderScotch CRM is a comprehensive customer relationship management system built using Django. It is designed to streamline business operations by providing robust features like task management, project tracking, employee management, leave management, invoice generation, and salary slip management. The CRM integrates functionalities for handling client interactions, monitoring revenues and expenses, and generating profit and loss reports. This CRM system also offers dynamic charting, search filters, and PDF generation for invoices and salary slips.

### • SURVEY API

This project involves building a comprehensive API for managing user authentication, profiles, surveys, and withdrawal processes. It supports user sign-up, login, and profile management, along with survey creation and responses. The API integrates with Stripe for payments and enables email notifications and withdrawals for respondents. It uses MongoDB for data storage.
